

d3's patented Video Format Conversion (VFC) technology is a swappable output card that slots into the back of the gx and pro range servers.

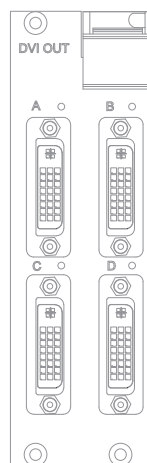

Output DisplayPort 1.2, DVI or SDI without changing the system. Mix signal formats and resolution types in the same project, with guaranteed frame synchronisation and near-zero latency.

Deliver massive shows with fewer machines and less hassle than ever, secure in the knowledge that the system will effortlessly adapt to any changes the industry will bring in the future.
